

Unlocking the Mysteries of Gluten Sensitivity// 8 CE

Saturday, April 24, 2010

Howard Johnson
3841 East Washington Ave.
Madison, WI 53704
(608) 244-2481
Registration // 8:00 a.m.
Program // 8:30 a.m. - 5:30 p.m.

Course Description

In this course you will learn how to effectively diagnose, treat, and stabilize wheat/gluten intolerance through advanced nutritional strategies and address all the affected body systems – not just the gastrointestinal (GI) tract.

Contrary to popular notion, gluten sensitivity can affect body systems beyond the GI tract. In addition to celiac disease – a multi-symptom, multi-system disorder – gluten intolerance is now identified as a contributing factor in a wide range of conditions such as:

- Attention deficit disorder
- Depression
- Anxiety
- Chronic fatigue syndrome
- Migraine headaches
- Ataxia
- Osteoporosis
- Rheumatoid arthritis
- Type 1 diabetes
- Autoimmune thyroid disease
- Peripheral neuropathies
- and more

Join Dr. O'Bryan as he dispels the myths regarding gluten intolerance and celiac disease as well as uncovers their role in these increasingly common disorders.

**** This course fulfills the state requirement to maintain the Nutrition Counseling certification.***

About the Speaker

Thomas O'Bryan, DC is an internationally ranked chiropractor and practicing graduate of the Institute for Functional Medicine's Applying Functional Medicine in Clinical Practice. In this seminar Dr. O'Bryan dispels the myths regarding gluten intolerance and celiac disease as well as uncovers their role in these increasingly common disorders.
